

CIVIL 3D 2020

Maryland Training
Plot Style Settings

Maryland ctb file

Plot Style Settings

In order to get the drawings to plot correctly, you need to load the “**NRCS BWgray.ctb**” file. If you don’t have access to the NRCS Sharepoint site, please click this here to download the file.

How to load the new file:

- Right click in AutoCAD and select “**Options**” or type **Options** in the command line.
- In the Options display, select the “**Files**” tab
- Expand the “**Printer Support File Path**” and then “**Plot Style Table Search Path**”
- Select “**Add**” on the right
- A new path link will appear, select it and then select “**Browse**” and search for “C:\Users\Your.Name\USDA\Engineering – C3D Support Files” (this will only work if you are synced to the MD Engineering Sharepoint Site)
- Otherwise you will have to copy and place the ctb file into:
“C:\Users\Your.Name\appdata\roaming\Autodesk\c3d2020\enu\plotters\Plot Styles
- Click Apply
